

# Image Processing Engine (IPE)

Streamline and Automate Image Processing  
With a Comprehensive Analysis Solution

Gain a 99.95% accuracy rate with AI-driven image processing that incorporates a strategic mix of a sophisticated ALPR engine, manual reviews, make/model identification and DMV validation so you can confidently bill the right people. Featuring a configurable workflow engine with a modular approach, IPE is built to support your unique business needs by prioritizing areas of most importance. Customizable confidence score thresholds allow you to dictate when human validation is required for reduced manual intervention, increased automation and maximized revenue capture. Supported by innovative performance tracking technology with on-demand dashboards for real-time operations monitoring, IPE merges augmented data sources with added validation power for a more reliable image processing system.

Take OCR Results to  
the Next Level With:

- Advanced AI-driven ALPR
- Intelligent make/model identification
- Correlated DMV validation
- Automation-driven confidence scoring
- Minimized manual intervention
- Streamlined internal analysis

## Minimize Leakage and Code-Offs

Eliminate lost revenue and bill for more vehicles by increasing the effectiveness of your image review operations with state-of-the-art machine learning, amplified data sources and highly trained personnel.

## Gain 99.95% Accuracy Rate

Take the guesswork out of billing the right people with a solution that delivers exceptional accuracy and is backed by a leadership team averaging 15+ years of tolling experience.

## Reduce Image Processing Fees

Drive down unnecessary transactional costs with innovative processing technology that significantly reduces the amount of manual review needed.

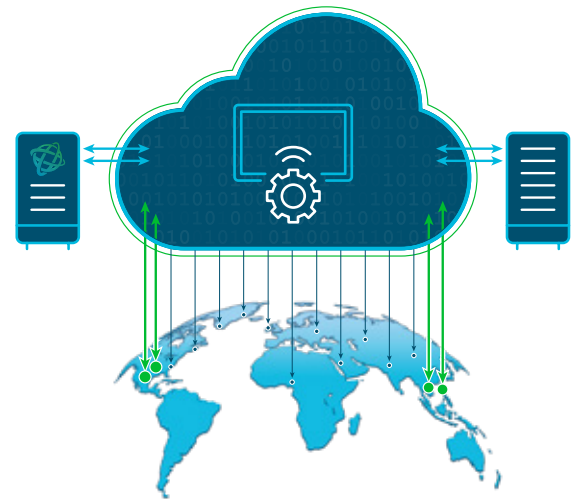

## Increase Processing Speeds

Minimize the need for time-intensive validation with automation-driven technology built to accelerate turnaround, boost accuracy and streamline daily operations.

## Integrate Quickly and Scale With Ease

Ramp up next-level image analysis quickly with hybrid cloud technology that requires no extra equipment or expensive setup costs. Our state-of-the-art Global Image Review Software (GIRS) enables seamless integration with your current business model so you can connect to amplified data sources and a global image review team with minimal setup time. No matter your image processing needs, IPE's straightforward integration and comprehensive design delivers a one-stop solution built to simplify internal operations and adapt to changing business needs as you scale.

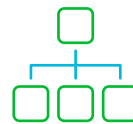

### Partner With a Client-Centric Organization Proven to Deliver 15+ Years of Tolling Experience Across the Globe

Guide continuous  
process improvements

Increase revenue and  
bottom line impact

Enhance organizational  
reputation among  
stakeholders

Improve operational  
effectiveness

## About Global Agility Solutions

Global Agility Solutions offers comprehensive on and offshore Business Process Outsourcing (BPO) services and solutions focused on automating and advancing repeatable business operations that impact bottom line revenue. With offices in the US, Philippines and Vietnam, Global Agility is backed by an extensively trained and highly scalable workforce that is proven to ramp quickly and deliver unrivalled results. Committed to continuous process improvement, industry-leading technology and client satisfaction, Global Agility is modernizing the BPO space and reshaping the way organizations do business.
